- Tamil (Intermediate)

PROFILE

Enthusiastic Software Engineer with a solid foundation in software development and hands-on experience in building mobile and web applications. Currently pursuing a Software Engineering degree, with a strong focus on designing innovative, user-centric solutions and improving system efficiency. Skilled in collaborating on projects, adapting to new technologies, and following best practices in development. Eager to apply knowledge and creativity to deliver impactful software in fast-paced, dynamic environments.

WORK EXPERIENCE

Content Manager (WordPress) | Aadira Holdings

February 2023 - July 2023

- Uploaded, edited, and published content on WordPress.
- Optimized text, images, and multimedia for SEO and user engagement.
- Collaborated with teams to ensure content quality and consistency.

EDUCATION

BEng (Hons) Software Engineering | University of Staffordshire

2023 (October)- Present

Good Shepherd Convent Kandy

2009 - 2023

PROJECTS

GuardianEye - AI Phishing Detection (GuardianEye) Present

Built an AI-powered mobile phishing detection system using Python, Kotlin, and Scikit-learn. Developed an Android app with machine learning models (Random Forest & Logistic Regression) to detect phishing in SMS, URLs, and QR codes across English, Sinhala, and Tamil with 98%+ accuracy. Implemented a Flask REST API for model deployment and real-time notification monitoring for instant threat alerts.

TailorHer (TailorHer) 2025

Built a dynamic eCommerce platform using PHP, Laravel, Tailwind CSS, JavaScript, and HTML. Developed user authentication, product listings, and shopping cart functionalities. Utilized Tailwind CSS for responsive design and Laravel for backend management, ensuring a seamless and scalable shopping experience.
